Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Wegmann (US 7,088,458).

Art Unit: 2886

Wegmann shows measuring an optical imaging system comprising:

a mask structure (6) which is arranged on an object side, and

a grating structure (18,14) which is arranged on an image side,

wherein

the mask structure comprises one or more one-dimensional mask structure patterns, and the grating structure to be arranged on the image side comprises one or more two-dimensional grating structure patterns (claim 2) or

wherein the mask structure comprises one or more two-dimensional mask structure patterns since the pinholes and the test beam windows create a two-dimensional pattern, and the grating structure comprises one or more one-dimensional grating structure patterns.

Allowable Subject Matter

3. Claims 2-5 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter:

Claims 2-5 are allowable for reasons argued in Applicant's response of 9/18/06.

Response to Arguments

Applicant argues that Wegman does not disclose the mask structure and the grating structure having a different dimensionality. However, the claim does not limit what aspect of “dimensionality” is being claimed. Any structural difference between the mask structure and the grating structure would meet the claimed limitation of “different dimensionality). Figure 10 shows a grating drive 18 having a grating (14) has a different structural arrangement than the mask. The mask can comprise a pinhole and the test beam window. Therefore, the mask structure has a different dimensionality than the grating structure. Claim 6 does not recite the limitation argued by Applicant that the mask structure has a different dimensionality than the grating structure, thus that limitation is not read into the claim.
